Mr. Rosselle,

The traffic study and the signal application were submitted to the GA DOT after approval by the City of Jefferson council during the last voting meeting in November. Since then the GA DOT has reviewed and returned the traffic study with suggested changes, which request additional information. Street Smarts, the company that the City of Jefferson contracts with to do the traffic study, is addressing these changes and requests for additional information. After the changes have been made I will be glad to provide you with a copy.

John A. Ward III  
Assistant City Manager  
City of Jefferson

Dale, John:

If it's now available for public use, can you please send me a copy of The warrant analysis for the new traffic signal at the intersection of US 129 & Old Pendergrass Rd.? I would also like a copy of the application to GDOT, if available.

Any info you can provide on the current status of this project would be greatly appreciated.

If there is anything I or the merchants at Loggins Corners can do to Help with supporting or funding this project, please let me know.

Thanks!  
Dave Rosselle
